

Wescan Electrical Mechanical Services (Security Division)

Lead Security Integration Technician

The Security Division of the Wescan Group of Companies (Cardac Systems Inc.) is seeking a licensed Lead Security Integration Technician to install, program, test, repair and and service a variety of Access Control, CCTV, Intrusion and Intercom systems through-out Manitoba. Preference will be given to technicians having certification in Genetec, Kantech and AMAG control systems or any experience in the installation of these systems. Knowledge of programming and software related products is also an asset. We are a growing company, and we offer industry-leading wages, a full benefits plan, and a vehicle. We are willing to assist with relocation expenses for the right individual. Come join our team!

Wescan Electrical Mechanical Services and Cardac Systems Inc.

Cardac Systems Inc. (a member of the Wescan Group of Companies) is a technology solutions provider, serving Manitoba business since 1991.

Our capabilities include:

- Video Surveillance, Intrusion Detection, Access Control, Multi-Tenant Entry Control & Intercom Systems.
- Network Design & Implementation.
- Structured Data (Fibre & Copper) & WAP (wide area WiFi).

We service operations from a single shop to very deeply integrated Multi-Facility, Multi Tenant Enterprise Security Management System, and we can support projects in the areas of design, implementation, and certification. Due to our partnerships with Wescan and a variety of other quality Manitoba companies, we can mobilize all the resources required for even the largest of projects, and we work in all locations across the province.

Responsibilities

- Reads blueprints, schematics, manuals, and other specifications to determine installation requirements; interprets manuals, schematics, and wiring diagrams, and repairs equipment.
- Executes technical aspects of a project, including installation, testing, troubleshooting, and repair following established professional methods.
- Maintains high level of customer satisfaction, product performance, installation techniques and standards; meets project deadlines and budgets.
- Leads construction and service team, makes suggestions for product and installation improvements.
- Identifies and communicates risks; complies with all safety protocols and procedures.
- Participates in system start-up/check-out, commissioning, certification, and related customer training.
- Communicates effectively with office, field staff, and customers.
- Manages and maintains truck inventory of security products, allocates and re-stocks as necessary.
- Prepares service call reports upon completion of each call, and records customer sign-off.
- Completes daily/weekly time sheet.
- Maintains technical knowledge regarding the industry and respective field of expertise by attending external and internal training.

Qualifications

- At least 3 years of experience in the security industry, working with Access Control, CCTV, Intrusion and Intercom systems, with proven installation skills.
- Class M electrical license (Class M-Alarm or Class M-Data).
- Certifications in AMAG, Genetec, Kantech, DSC are an asset.
- Training in AXIS, Samsung, Hikvision camera lines.
- Experience in Nurse Call an asset.
- Good understanding of networking and network structure.
- Ability to identify electrified door hardware required on doors.
- Valid class 5 driver's license with clean driving record.
- Clean criminal record (Canada-Wide).
- Excellent verbal and written communication skills (English).
- Ability to work independently or as part of a team; initiative; good problem-solving skills.
- Knowledge of building codes an asset.
- Industry related manufacturer and safety certifications would be beneficial.
- Familiarity with some or all of the following systems:

Video Surveillance: Mostly IP with some analog; installation, configuration and programming.

Card Access: Including controller, reader, relay and lock installation, interconnect and configuration. Software installation, configuration and programming an asset.

Intrusion: Wireless and hardwired, including panel, keypad and device installation, interconnect and configuration. Panel programming, both manually and via software.

Intercom: Analog and IP, including installation, interconnect and setup of systems
